HTML & CSS

Portfolio Presentation

Andrea Manuppelli

Used technologies:

- **HTML**

The backbone of web pages, shaping content with headings, paragraphs, lists, hyperlinks, and multimedia.

- **CSS**

Styling, layout, and animations.

- **Bootstrap 5.3**

The most popular CSS framework for developing responsive, mobile-first websites, perfect for easier development with great results.

- **Sass**

Preprocessor for CSS. used for developing websites with variables, functions, and mixins.

Color Palette:

A deep, serene palette evoking a nocturnal landscape. Dominant shades of blue (#011b2a, #1b2a6a) anchor the design, while a warm yellow accent (#f0c204) adds energy. Crisp white text (#f5f5f5) ensures optimal readability against the dark backdrop

- **Primary: #011b2a**

The main color of the website.

- **Secondary: #1b2a6a**

The secondary color of the website.

- **tertiary color: #f0c204**

The tertiary color of the website. used for highlights

- **Text color: #f5f5f5**

The main text color of the website.

Website Pages:

- **Home:**

The main page of the website containing my skills, a photo of me and a summary

- **Portfolio:**

Page containing my projects contained on github.

- **Curriculum Vitae:**

Page containing my curriculum vitae.

Contact Form:

Each page contain a contact form to send me an email, you can open it in navbar
I used formspree external service to avoid creating a backend.

Website Structure:

Each page contain a navbar and a footer. I used Bootstrap5 breakpoints to create a full responsive design.

SEO:

Each page contain a different metatags to improve my SEO. I added my site to the Google Serach console using effective keywords to reach my target.
Favicon is available

Thanks for reading.
